

2019 Annual Report

New England Anti-Vivisection Society

2019 has been a historic year for our NEAVS family and the animals we fight to protect.

Together—with your support—we've proven the power of collective action to end animal experimentation in our lifetime.

Your love of animals is stronger than any force maintaining the status quo to make money off the torture of animals in labs. Join us in celebrating ten victories of 2019 that we achieved together.

Thank you for joining our fight!

For the animals,

Freeing Animals from Labs

1. We exposed horrific experiments at the University of California, Davis—including a study where seven infant [monkeys](#) were poisoned to death. Supporters like you rallied into action, demanding accountability.
2. Our Animal Rescue Team [rescued](#) and rehomed dogs and cats tortured in cruel medical experiments at a university in Mexico.
3. As we liberated animals from labs, we made sure they found kindness and compassion in sanctuaries. Because of your continued love and support, Emma the chimp (above) is free after years of confinement, isolation, and pain.

Taking the Fight to Abusers

We're Ending Animal Experiments. For Good.

4. We mobilized nearly 17,000 animal lovers to [take action](#) against Nestle/Purina for testing on animals inside their research facility—including Tyson the cat, whose lifeless body was found in a holding device.

5. We launched a [grassroots training program](#) for activists—to help shut down labs in their own communities.

6. We began investigating and targeting a massive corporation called Marshall BioResources that breeds and sells dogs for one purpose: to use in cruel science experiments. Watch our [drone footage](#) of their hidden facilities.

7. We filed a [lawsuit](#) to stop the psychological pain inflicted on animals used in research by the United States Department of Agriculture (USDA)—joining forces with Harvard Law School's Animal Law and Policy Clinic and the Animal Legal Defense Fund.

8. We championed the development of a groundbreaking “Count and Reduce” policy. Through this policy, for the first time ever, taxpayers will get a full accounting of all the animals used in experiments by our government's National Institutes of Health (NIH).

Our grassroots team delivers trainings and resources to advocates like you. Our government affairs team pounds the halls of Congress to move forward incredibly important legislation that will free animals from labs once and for all.

Your energy and passion drive our success.

as seen from the sky in our drone investigation*

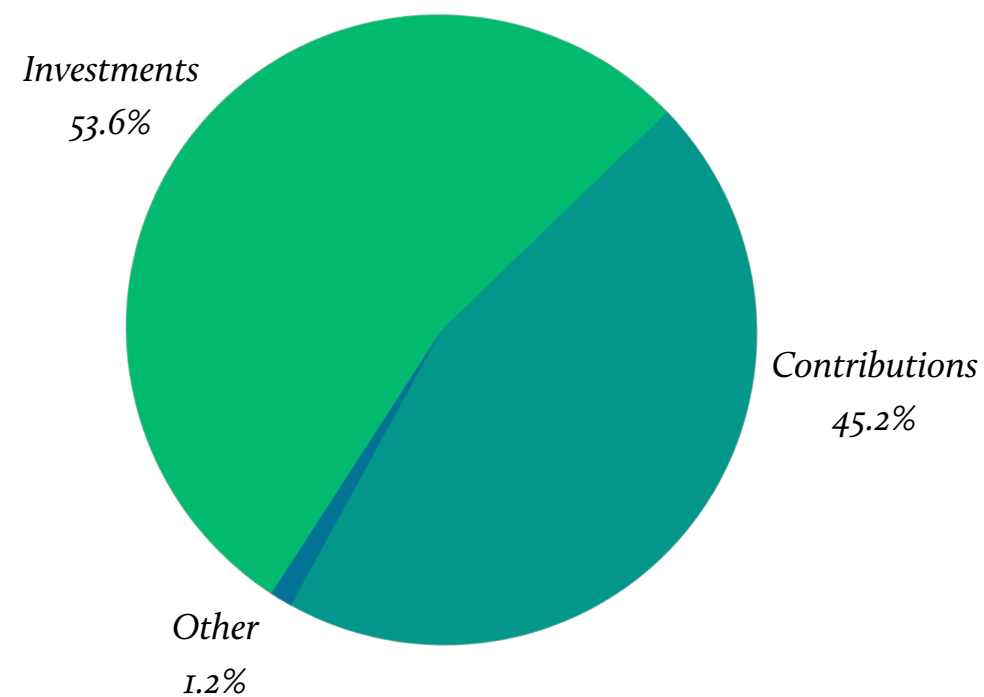

Getting Powerful Results

9. We shut down a [bill](#) that would have hidden animal abuse. A “lab gag” bill—aimed at ensuring information about what happens in labs is hidden from public view—looked destined to pass in California. You helped us defeat it!

10. We put a stop to 30 years of kitten-killing experiments at the USDA. Facing pressure from NEAVS supporters, key allies in Congress, and animal rights groups, the USDA agreed to end these experiments and find homes for the remaining [kittens](#).

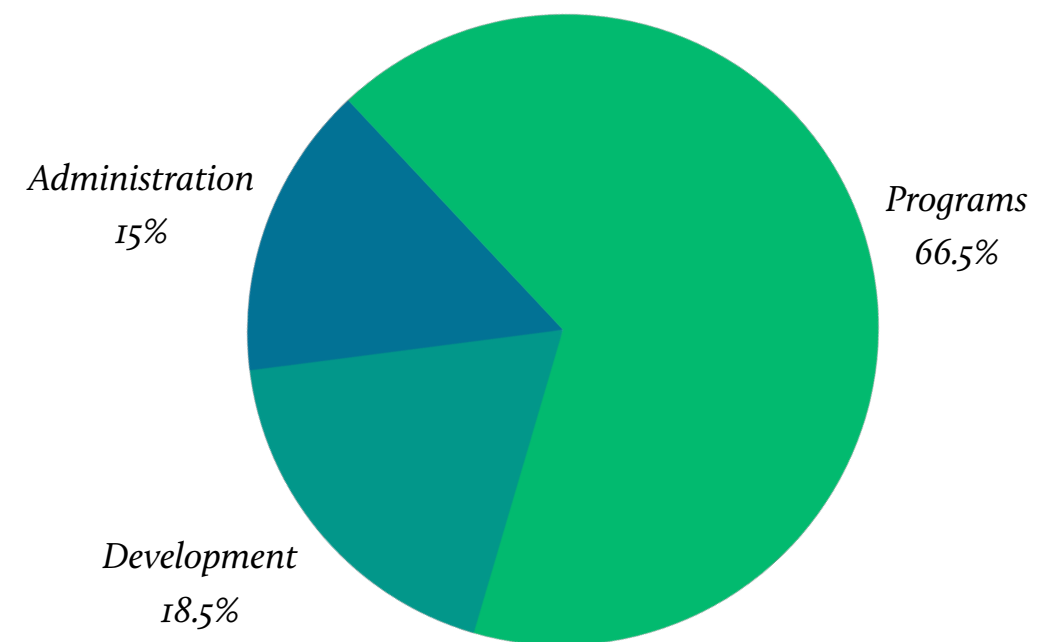

2019 Financials

Revenue

Investments	\$390,303
Contributions	\$329,328
Other	\$8,411
Total Revenue	\$728,042

Expenses

Programs	\$992,995
Development	\$276,253
Administration	\$224,427
Total Expenses	\$1,493,635
